AbbVie EDS - Block Authoring Guide

Authoring guide for the Accordion, Modal, and Carousel Video Playlist blocks in the Universal Editor.

Quick Reference

Resource	URL
Preview	https://main--abbvie-eds-poc--Nishant-Adobe.aem.page/
Live	https://main--abbvie-eds-poc--Nishant-Adobe.aem.live/

Supported Brands

Brand	Site Path
AbbVie (corporate)	/abbvie/
Botox	/botox/
Linzess	/linzess/
Mavyret	/mavyret/
Rinvoq DTC	/rinvoq-dtc/
Rinvoq HCP	/rinvoq-hcp/
Skyrizi HCP	/skyrizi-hcp/
Venclexta	/venclexta/

1. Accordion Block

The Accordion block creates expandable/collapsible content sections. Each item has a heading that users click to reveal the content below.

How to Add

1. In the Universal Editor, click
 1. **Add Block**
2. Select **Accordion** from the block list
3. Add **Accordion Items** inside the accordion

Accordion Block Properties

The Accordion block itself has no required properties beyond the standard block settings. Style and behavior are determined by the brand.

Accordion Item Properties

Each item inside the accordion has these fields:

Field	Required	Type	Description
Item Heading Text	Yes	Text	The clickable heading that shows/hides the content
Item Description Text	Yes	Rich Text	The content revealed when the item is expanded

Default To Open	No	Toggle (on/off)	If on, this item is expanded when the page loads. Default: off (collapsed)
------------------------	----	-----------------	--

Authoring Steps

1. Add an **Accordion** block to your section
2. Click inside the accordion and add an **Accordion Item**
3. Fill in the **Item Heading Text** (e.g., "What is RINVOQ?")
4. Fill in the **Item Description Text** with the answer content
5. Optionally toggle **Default To Open** if the item should start expanded
6. Repeat to add more items
7. Preview and Publish

Brand Support

The Accordion block is styled for all brands:

Brand	Notes
AbbVie	Corporate styling
Botox	Brand-specific colors
Linzess	Purple/orange palette
Mavyret	Navy/orange palette
Rinvoq	Plum/gold palette
Rinvoq HCP	Plum with HCP-specific styling
Skyrizi HCP	Navy/yellow palette
Venclexta	Teal/gold palette

Example

Item Heading Text	Item Description Text	Default To Open
What is RINVOQ?	RINVOQ is a prescription medicine used to treat...	off
How do I take RINVOQ?	RINVOQ is taken once a day with or without food...	off
What are the side effects?	Common side effects include...	off

2. Modal Block

The Modal block creates a popup dialog that loads content from a fragment page. Modals can be triggered by a button click, on page exit, or automatically on page load.

How to Add

1. In the Universal Editor, click
 1. **Add Block**
2. Select **Modal** from the block list
3. Fill in the required fields

Modal Properties

Field	Required	Type	Description
-------	----------	------	-------------

Link	Yes	Content Link	Path to the fragment page containing modal content
Text	Yes	Text	Label for the trigger button (e.g., "Open modal", "Learn more")

How Modals Work

1. **Create a fragment page** first — this is the content that appears inside the modal. Create it as a regular page in AEM (e.g., /modals/warning-on-leave)
2. **Add the Modal block** to the page where you want the trigger button
3. Set **Link** to the fragment page path
4. Set **Text** to the button label
5. When a user clicks the button, the modal opens and loads the fragment content

Modal Variants

Variants are applied as CSS classes on the block. Select them in the block's **Classes** field:

Variant	Description	Use Case
<i>(default)</i>	Standard centered modal	General purpose dialogs
panel	Slide-in panel from right	Side panels, settings
exit	Triggered on mouse leave (desktop)	Exit-intent promotions
exit-small	Smaller exit-intent modal	Compact exit warnings
small	Narrow dialog (~480px)	Confirmations, alerts
media	Wide modal, no inner padding	Video/image content
image	Full-bleed lightbox	Image galleries
information	Accent border on left	Informational notices
once	Shows once per visitor (cookie)	One-time promotions
once-session	Shows once per session	Session-based notices
force	Cannot be dismissed, no close button	Mandatory acknowledgments

Brand Support

Brand	Notes
LinzeSS	Purple palette, Lato/Bebas fonts, modal tokens in styles/linzeSS/tokens.css
Mavyret	Navy/green palette, Univers Condensed font, green close button
Rinvoq	Plum palette, Graphik font, thin close button
Rinvoq HCP	Plum palette, wide media variant for study details with tabs
Skyrizi HCP	Navy/sky blue palette, gradient top bar, pill buttons
Venclexta	Teal palette, Warning on Leave pattern

Example: Warning on Leave Modal

Field	Value
Link	/modals/leaving-site-warning
Text	Learn more
Classes	<i>(leave empty for standard)</i>

Example: Exit-Intent Modal

Field	Value
Link	/modals/exit-promo
Text	(not shown — modal triggers on mouse leave)
Classes	exit

3. Carousel Video Playlist Block

The Carousel Video Playlist block displays Brightcove video playlists with various layout options. Videos, thumbnails, titles, and descriptions are loaded automatically from Brightcove.

How to Add

1. In the Universal Editor, click
 1. Add Block
2. Select **Carousel Video Playlist** from the block list
3. Fill in the Brightcove IDs and select a layout

Block Properties

Field	Required	Type	Description
Layout	Yes	Dropdown	How the videos are displayed (see Layout Options below)
Section Heading	No	Text	Optional heading above the playlist
Section Description	No	Rich Text	Optional description text
Max Visible Cards	No	Dropdown	Limit visible cards (Show All, 1-6). Default: Show All
Brightcove Account ID	Yes	Text	Brightcove account number
Brightcove Playlist ID	Yes	Text	Brightcove playlist number
Brightcove Player ID	Yes	Text	Brightcove player identifier
Enable Captions	No	Toggle	Enable/disable video captions. Default: off
Anchor ID	No	Text	HTML anchor for deep linking
Play Mode	No	Dropdown	Default (plays in main player) or Inline (Mavyret only)

Layout Options

Layout	Description	Best For
Cards Grid (default)	2-column grid of video cards with play icons and title overlay	Most pages — patient stories, video galleries
Grid	Dark background, 3-column grid with section heading	Homepage video sections (Linzess)
Featured	Large video (70%) + quote panel (30%) + thumbnail strip	Patient experience pages (Linzess)
Bottom	Video player on top, thumbnail strip with arrows below	Video detail pages
Left Sidebar	Vertical playlist on left, video on right	Browse-and-watch layouts
Right Sidebar	Video on left, vertical playlist on right	Browse-and-watch layouts

Known Brightcove IDs

Rinvoq (DTC)

Property	Value
Account ID	1029485116001
Player ID	bC11jvCtd

Condition	Playlist ID
Psoriatic Arthritis (PsA)	1857676041435802394
Atopic Dermatitis (AD/Eczema)	1830214212547170603

Authoring Example: Cards Grid

Field	Value
Layout	Cards Grid (default)
Section Heading	<i>(leave empty)</i>
Section Description	<i>(leave empty)</i>
Max Visible Cards	Show All
Brightcove Account ID	1029485116001
Brightcove Playlist ID	1830214212547170603
Brightcove Player ID	bC11jvCtd
Enable Captions	off
Anchor ID	<i>(leave empty)</i>
Play Mode	Default (plays in main player)

Authoring Example: Bottom Layout

Field	Value
Layout	Bottom — playlist below
Section Heading	<i>(leave empty)</i>
Section Description	<i>(leave empty)</i>
Max Visible Cards	Show All
Brightcove Account ID	1029485116001
Brightcove Playlist ID	1857676041435802394
Brightcove Player ID	bC11jvCtd
Enable Captions	off
Anchor ID	<i>(leave empty)</i>
Play Mode	Default (plays in main player)

Adding Individual Videos (Without Playlist)

If you don't have a Brightcove playlist, you can add videos individually using **Playlist Video Item** child blocks:

Field	Required	Description
-------	----------	-------------

Brightcove Video ID	Yes	Individual video ID from Brightcove
Video Title	Yes	Display title for the video
Transcript URL	No	Link to transcript page
Transcript (inline)	No	Transcript text shown inside the block
Patient Name	No	Patient name (for Featured layout)
Condition / Prescribed Info	No	Condition text (for Featured layout)
Patient Quote	No	Quote text (for Featured layout)

Play Mode

Option	Description	When to Use
Default (plays in main player)	Clicking a thumbnail loads the video in the main player area	All brands except Mavyret
Inline (plays in thumbnail — Mavyret only)	Video plays directly inside the thumbnail card	Mavyret modal grid pattern only

Brand Support

Brand	Layouts Available	Notes
AbbVie	Cards, Bottom, Left, Right	Corporate styling
Botox	Cards, Bottom, Left, Right	Brand colors
Linzess	Grid, Featured	Dark purple homepage grid; featured patient experiences with quote panel
Mavyret	Cards (modal grid)	Inline play mode; click opens modal or plays inline
Rinvoq	Cards, Bottom, Left, Right	Plum brand color, Graphik fonts
Rinvoq HCP	Cards, Bottom, Left, Right	HCP-specific styling
Skyrizi HCP	Cards, Bottom, Left, Right	Navy/yellow palette
Venclexta	Cards, Bottom, Left, Right	Teal palette

General Tips

Previewing Changes

1. After making changes in the Universal Editor, click **Publish**
2. Open the preview URL: `https://main--abbvie-eds-poc--Nishant-Adobe.aem.page/{site}/{page}`
3. Wait ~30 seconds for changes to propagate
4. Hard refresh (Ctrl+Shift+R) if you don't see updates

Testing Branch Changes

To test code from a specific branch, add `?ref={branch-name}` to the URL:

```
https://author-p160552-e1944799.adobe.aemcloud.com/content/abbvie-eds-poc/{site}/{page}.html?ref={branch-name}
```

Troubleshooting

Issue	Solution
Block not rendering	Check all required fields are filled in
Videos not loading	Verify Brightcove Account ID, Playlist ID, and Player ID are correct
Wrong layout	Check the Layout dropdown matches your intended display
Modal not opening	Ensure the fragment path exists and is published
Accordion items all collapsed	Toggle "Default To Open" for items that should start expanded
Play Mode confusing	Leave as "Default" for all brands except Mavyret
